Easy Scan Plus and Air4 Remotes Programming Software - News

Easy Scan Plus - Version 3.0.3 Air4 Remotes Programming Software - Version 2.0.0

New Functions

1 Wider coverage

The Air4 Programming Software coverage has been enlarged, giving you the possibility to copy a wider range of original remotes with over 700 models now duplicable.

2 Compatibility with Air4 Home/Air4 Home PRO

The application list now includes also Air4 Home and Air4 Home PRO, the universal devices for opening garage doors, gates and barriers directly from a smartphone.

3 Guide to Source Code Acquisition

The new Air4 Programming Software has onscreen instructions guiding you step-by-step in the procedure to acquire the source code used by several brands, such as BFT®, FAAC® and Erreka®.

4 "Notes" Field

The new software allows you to add a description for every registered button on the remote. In the "Notes" field, you can specify what each button is for (e.g. garage door, entrance gate, etc.).

5 Print Remote Instruction Function

Once you have copied an Air4 remote, you can print the procedures the final customer needs to carry out on the receiver. The software advises if the remote is ready for use or needs an OEM or ALS procedure.

Nuove Funzioni

1 Copertura più ampia

La copertura di Air4 Programming Software è stata ampliata, dandoti la possibilità di copiare una gamma sempre più vasta di radiocomandi originali con oltre 700 modelli duplicabili.

2 Compatibilità con Air4 Home/Air4 Home PRO

Da oggi la lista applicazioni comprende anche Air4 Home e Air4 Home PRO, i dispositivi universali che consentono di aprire basculanti, cancelli e barriere direttamente con lo smartphone.

3 Guida Acquisizione Codice Sorgente

La nuova versione di Air4 Programming Software è stata potenziata con una guida che ti segue passo passo nella procedura di acquisizione del codice sorgente delle principali marche che lo gestiscono, come BFT®, FAAC® ed Erreka®.

4 Campo "Note"

Il nuovo software ti offre la possibilità di inserire una descrizione per ogni pulsante acquisito. Nel campo Note infatti è possibile specificare l'utilizzo di ogni singolo tasto.

5 Stampa Istruzioni Radiocomando

Una volta effettuata la copia di un radiocomando Air4 potrai stampare le eventuali operazioni che il cliente dovrà effettuare in centralina. Il software indica, infatti, se il radiocomando è pronto all'uso oppure richiede di effettuare la procedura OEM o ALS.

BFT

Simultaneously press the two buttons 1 and 2 on the BFT remote control and release as soon as the led starts flashing (transmission of source code). Press and hold down the button to be copied from the original remote control. The Air4 led will flash rapidly; press the button on which the code will be memorised and hold down until the led goes out.

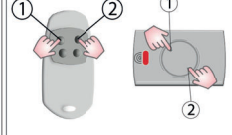

With old versions of BFT Mitto, do not press the two keys (1 and 2); use a pin to press the hidden key on the back of the remote control.

FAAC

A MASTER remote control (not SLAVE) is required to copy and acquire the source code.

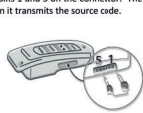

How to recognise a MASTER and/or SLAVE remote control.
 *master: press any key, the LED will flash and then show a fixed light.
 *slave: press any key, the LED will immediately show a fixed light.

Simultaneously press the two buttons 1 and 2 on the FAAC remote control and release as soon as the led starts flashing (transmission of source code). Press and hold down the button to be copied from the original remote control. The Air4 led will flash rapidly; press the button on which the code will be memorised and hold down until the led goes out.

ERREKA IRIS

With the original remote control, create an electric bridge between pins 1 and 5 on the connector. The receiver will beep when it transmits the source code.

ERREKA LIRA

With the original remote control, use a pin to press the hidden key located near the push buttons. The remote control will beep when it transmits the source code.

Key Programming Software Update for Mitsubishi® ADS2281 - Code D753494AD

🇬🇧 Advanced Diagnostics is pleased to announce the release of a new software update for Mitsubishi® ADS2281. This software programs bladed and proximity keys for several Mitsubishi® models also in all keys lost situations. All keys will be erased before programming. There is an add key option if you wish to add one additional key / remote to an existing key.

🇮🇹 Advanced Diagnostics ha sviluppato il nuovo aggiornamento software ADS2281 per la programmazione di chiavi per Mitsubishi®. Questo software consente di programmare chiavi con canna metallica e di prossimità per numerosi modelli Mitsubishi® anche in caso di perdita totale della chiave. Tutte le chiavi registrate in centralina saranno cancellate prima della programmazione. È anche possibile aggiungere nuove chiavi o nuovi radiocomandi agli esistenti.

🇩🇪 Advanced Diagnostics gibt bekannt, dass für Mitsubishi® ADS2281 ein neues Software-Update erschienen ist. Die Software kann für verschiedene Mitsubishi® Modelle Metall- und Keyless-Go-Schlüssel auch bei Verlust aller Schlüssel programmieren. Vor dem Programmieren werden alle Schlüssel gelöscht. Es gibt eine Funktion „Schlüssel hinzufügen“, wenn Sie einen bestehenden Schlüssel bzw. eine Fernbedienung hinzufügen möchten.

🇫🇷 Advanced Diagnostics a le plaisir d'annoncer la sortie d'une nouvelle mise à jour du logiciel pour Mitsubishi® ADS2281. Ce logiciel programme les clés en métal et de proximité pour différents modèles de Mitsubishi® même quand on a perdu toutes les clés. Toutes les clés seront effacées avant la programmation. Il existe également une option si vous souhaitez ajouter une clé/télécommande supplémentaire à une clé existante.

🇪🇸 Advanced Diagnostics se complace en anunciarles el lanzamiento de una nueva actualización software para Mitsubishi® ADS2281. Este software programa las llaves de proximidad y no para diferentes modelos de Mitsubishi® en caso de pérdida total de las llaves. Todas las llaves se borrarán antes de ser programadas. Aparece también una opción de añadir llaves si usted desea añadir una llave/ mando a las llaves ya existentes.

🇵🇹 Advanced Diagnostics desenvolveu a nova atualização software ADS2281 para programar as chaves para Mitsubishi®. Este software programa as chaves de proximidade e de metal para modelos diferentes de Mitsubishi® também no caso de perda de todas as chaves. Todas as chaves serão apagadas antes da programação. Também é possível adicionar novas chaves ou novos rádio controlos aos já existentes.
